Arianne Jasmine Tan

Technical Lead @ Inland Revenue Authority of Singapore | Microsoft Certified
Singapore

Summary

Graduated in 2019 with a Bachelor of Science in Computer Science from the University of Santo Tomas, I bring a solid foundation in software development and technical problem-solving. My career at the Inland Revenue Authority of Singapore (IRAS) has progressed from Software Engineer to Technical Lead, showcasing my commitment to growth and delivering impactful solutions. Currently serving as Technical Lead for the IRIN3 Phase 3 project at IRAS, I focus on technical leadership, agile delivery, and stakeholder management. I have contributed to streamlining development processes through API and microservices design, Kafka integration, and Azure DevOps coordination. My goal is to consistently drive collaborative success and innovative solutions in dynamic technical environments.

Experience

Inland Revenue Authority of Singapore (IRAS)
6 years 10 months

Technical Lead
January 2023 - Present (3 years 8 months)
Singapore

IRIN3 Phase 3 CDE / Small Volume Tax
TECHNICAL LEADERSHIP, AGILE DELIVERY, SCRUM FACILITATION AND RELEASE READINESS

Core Strengths: Technical Leadership, Agile/Scrum Delivery, Stakeholder Management, Sprint/Release Coordination, Azure DevOps, API/Microservices Design, Kafka, .NET Core, Git, SonarQube

- Led end-to-end technical ownership delivery by defining solution approach, documenting API endpoints, batch workflows and Kafka topics, and producing 46+ technical wiki pages that enabled frontend, backend, QE and application teams to work with clearer direction and fewer dependency blockers.

- Drove agile delivery across multiple workstreams by aligning Product Owners, Business Analysts, developers and QE teams on requirements, design decisions, sprint priorities, defect readiness and release checkpoints for sprint deliverables
- Acted as a scrum-style facilitator for SIT/UAT readiness by triaging bugs, removing environment/data blockers, validating fixes before user retesting and coordinating cross-domain issue resolution to keep delivery momentum across integration and user acceptance testing cycles.
- Standardised delivery governance using Azure DevOps by managing pull requests, branching strategy, deployment planning and bug lifecycle processes across developers, BAs and QE teams, improving transparency from defect creation through fix deployment, pre-validation and user retesting.
- Coached developers and uplifted engineering practices through local testing guidance, IRIN3 best-practice sharing, Application Insights, Storage Account and Log Analytics walkthroughs, pull request reviews, unit testing expectations and SonarQube quality checks.

Software Engineer

November 2019 - December 2022 (3 years 2 months)

Singapore

Case Microservice | AN ADAPTER LAYER FOR IRIN3 PROJECT

Languages and Framework: C#, .Net Core Tools and Packages: Kafka, Docker, Git

- Developed an adapter layer between D365 and other microservices; subscribe Kafka events and send to D365 using D365 web service
- Developed a scheduler that triggers a customized API that updates users' business units, seniorities, and queue membership using Logic Apps and D365 Web service.

Software Engineer

November 2019 - December 2022 (3 years 2 months)

Singapore

Case Management System | D365 CUSTOMER SERVICE

Languages and Framework: C#, Javascript, .Net Framework Tools and Packages: Dynamics 365, Power Platform, Dynamics CRM SDK, XRMToolbox, FakeXrmEasy, Git, SonarQube

Day to day job includes:

- Planning & Analyzing: working closely with Product Owners and Stakeholders, understanding their user stories, doing story boards and functional workflow diagram following Agile methodologies

- Implementing & Testing: developing and coding in D365 including Unit Tests, pushing commits and create pull requests to master branch
- Developed a model-driven app user-interface with Dynamics 365 Entity Customizations and Javascript Web Resources • Decreased user's manual work of assigning items to themselves by developing automated routing rules using Dynamics 365 out-of-the-box workflows, custom workflow activities (workflow assemblies), and D365 Plugins
- Created D365 integration with other systems by developing Custom API, Virtual Entities and D365 Plugins; developed unit tests to ensure quality readiness
- Performed system deployment from DEV to higher environments using D365 solutions and patches with the help of Azure Pipeline
- Worked with a team in assisting integration testing, and User Acceptance Testing to fix the reported bugs having 100% resolution on critical bugs
- Served as a technical specialist providing technical, functional, and business analyst support with Business Stakeholders acquiring domain knowledge; ensuring their requirements are met while leveraging Dynamics 365 functionalities
- Created a technical documentation of the project giving the maintenance team and external projects background of the current system.

WeRK.PH

Web Developer | IT Intern

June 2018 - July 2018 (2 months)

Ortigas, Pasig City, Philippines

ONLINE RECRUITMENT JOB PORTAL

Languages: PHP Laravel, SQL

- Contributed an increase of 30% in the completion of the system migration for the Admin Side by coding functions with CRUD operations, manual testing and debugging code
- Improved the digital recruitment service of Teledevelopment company by integrating werk.ph thru PCRecruiter API and PHP cURL
